

SMART CITY LIGHTING

Implementation of intelligent lighting systems in urban areas, which use advanced technologies like sensors and wireless communication to create **energy-efficient** and **sustainable lighting systems** in public places.

DAVIS LIGHTING

CONNECTED FUTURE

Smart-street lighting systems improve human life, the environment, and businesses, paving the way for smart cities with efficient solutions built on advanced technology such as wireless communication and low-energy streetlights. Advanced street lighting technology should prioritize comfort and sustainability for people, municipalities, and the planet. Municipalities can modernize public lighting infrastructure by using smart street control systems, remote streetlight control software, and communication technologies that add value to public lighting.

APPLICATIONS

Highway

Residential areas

Street lighting

Parking Space

BENEFITS OF SMART CITY LIGHTING

- Scalable communication network to facilitate real-time data exchange and remote monitoring
- Sensors and controllers to monitor lighting levels, traffic flow, and other environmental factors, allowing it to automatically adjust lighting levels and optimize energy consumption
- Intelligent software to manage and analyze data

DAVISMART PRODUCT RANGE

Street Lighting

Designed to be environmentally conscious and reduce light pollution while still providing ample lighting for outdoor environments.

HELIO

Urban Lighting

Designed to illuminate public areas, providing better visual comfort, improved visibility, crime prevention and energy savings.

PANTHERA
PTA

PANTHERA
PTG

“Partner with us to create a **brighter and safer urban environment**, where citizens can thrive and enjoy a better quality of life through our smart lighting solutions.”
